Fissal Ali

Computer Systems Student | Web & Mobile Developer | Cybersecurity Enthusiast

About

I'm a Computer Systems student at Abdullah Al-Salem University with a strong interest in web development, mobile app development, and cybersecurity. I enjoy building practical projects such as websites and planners, and I'm continuously learning how to design smooth, professional, and user-friendly applications. My goal is to expand my skills in cross-platform mobile app development (iOS & Android) and cybersecurity, while building a solid portfolio of projects.

Education

Abdullah Al-Salem University — Bachelor's in Computer Systems (In Progress)

Skills

Web Development	HTML, CSS, JavaScript
Frontend Design	Responsive layouts, Flexbox, Navigation menus, Dark/Light themes
Backend Basics	Node.js
Cybersecurity	Kali Linux basics (Wi-Fi password commands, terminal usage)
Version Control	Git & GitHub (cloning, pushing edits)
Other Tools	VS Code, Git Bash, CMD/PowerShell
Languages	English, Arabic

Projects

- Workout Planner Website – Designed and developed a responsive planner web app for fitness tracking.
- CV/Portfolio Website – Built a personal website to showcase my skills, projects, and experience.
- TradingSim Website Presentation – Prepared a full interactive presentation for a trading simulation project.
- Dynamic Forms & Navigation Systems – Created registration/login forms, mobile-friendly navbars, and multilingual (Arabic/English) support.

Certificates

Uni Coded Web Development Certificate – Abdullah Al-Salem University
